## **DETAILED ACTION**

### ***Amendment***

1. The submission of the amendment filed on 02/02/04 is acknowledged. At this point claims 1-6, 12, 15, 18-19, 21-24, 27, 29, 33, 35, 37-39, 42-43, 46, 69-70, and 73-75 have been amended. Claims 9-11, 13-14, 16-17, 28, 30-32, 34, 44-45, 47-68, 78-86, and 88-89 have been canceled, and no new claims have been added. Accordingly, claims 1-8, 12, 15, 18-19, 21-27, 29, 33, 35, 37-43, 46, 69-70, 73-77, 87, and 90-91 remain currently pending in the present application.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. All pending claims of record: 1-8, 12, 15, 18-27, 29, 33, 35, 37-43, 46, 69, 70, 73-77, 87, 90 and 91 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. All independent claims of record 1, 18, 33, and 69, as amended, recite: "said first conductive end cap comprises a first end coupled to said first terminal and a second end, and said

Art Unit: 2835

second conductive end cap comprises a first end coupled to said second terminal and a second end”, and “a second portion of the dielectric material occupies an area from said first ends to said second ends to impede arcing between said first conductive end cap and said second conductive end cap”.

The specification does not support the aforementioned limitations, since nowhere in the specification is disclosed that each endcap has a first and a second end.

Subsequently, it is not clear how the second portion of the dielectric material may occupy an area from said first ends to said second ends.

#### ***Response to Arguments***

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2835

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
